

1 ABSTRACT

2 UNIVERSAL DRUM COVER FOR XEROGRAPHIC DEVICE CARTRIDGES

3  
4 A drum cover or protector includes features that allow it to be used with substantially any  
5 xerographic device cartridge designed to be used in a xerographic device adapted to handle  
6 standard paper sizes. The drum protector may be secured to the cartridge in a protecting position.  
7 In this position, the protector covers the drum and blocks objects from coming into contact with  
8 the drum surface. The drum protector also includes an arrangement that prevents any critical part  
9 of the drum surface from coming into contact with the cover itself.
